

HANDRAIL SYSTEM

AUSTRALIAN MADE

SUPERIOR

EDGE

Introducing the 'EDGE'

The EDGE is extremely strong due to its one piece rotomoulded, polyethylene construction, and is highly resistant to harsh climatic and industrial conditions.

Standing 1.0m high and available in high visibility colours, the EDGE complies with Australian and New Zealand safety, with a top rail, mid rail and optional kick rail.

The EDGE can be easily installed in minutes and the aluminium or stainless steel hand rail inserts come with end caps which seal out water or debris. The stanchion has been rigorously tested including FEA analysis.

The EDGE is manufactured at Superior's rotomoulding facility on the Gold Coast, QLD Australia.

Features & Benefits

- > Odourless and inert
- > Rust and corrosion resistant
- > Light weight construction
- > Available in standard colours
- > Uses 2 bolts to secure in place
- > Quick adaption of kick rail using 4 bolts
- > Fuel and acid resistant
- > Seamless construction
- > UV 11 rating
